

LanLicenser

The Ultimate Inventory and Metering Solution

LanLicenser provides an integrated inventory and software metering solution, enabling you to effectively gain an understanding of your current situation by providing you with a view of what software is installed and where, and what is being used and by whom.

Optimise Cost savings

By giving you complete visibility on software installed vs. actual usage, LanLicenser enables you to purchase, install, upgrade and support the applications actually required by end-users to perform their business duties. This tighter adjustment of application portfolio to business needs will reduce the total ownership cost of your desktops dramatically.

Statistics from Gartner indicate that an organization may save as much as 20-30% of their licence costs in year 1

LanLicenser's integrated inventory (indicating what is installed and where) and advanced metering capability (what's in use and by whom) is vital for determining actual licence usage empowering our customers in identifying and removing unused licenses

Ensure license compliance

Most firms control software usage by maintaining an inventory of software installed on workstations and servers. They then purchase additional licenses as necessary to ensure compliance. The lack of information about actual usage inevitably results in unnecessary expenditure. With its advanced integrated inventory and metering technology, LanLicenser provides you with the information you need to make informed purchasing decisions and achieve license compliance at the right cost.

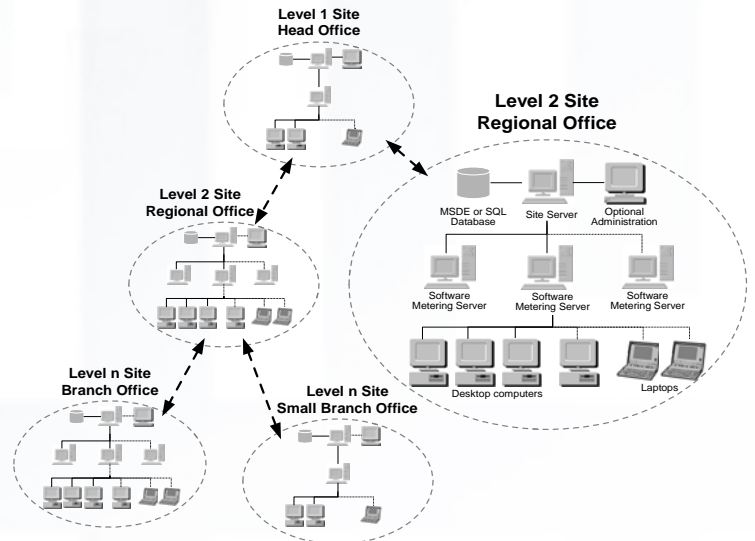

Control desktop usage reliably and cost-effectively

In environments where security and compliance require the control of application usage, rigorous enforcement consumes significant internal IT resources. Furthermore, locking down the desktops can harm users' ability to carry out normal business tasks.

LanLicenser proposes an innovative approach to the problem by preventing users from running prohibited software, whatever its source, without altering the desktop configuration. This approach offers 100% reliability at a very low cost.

LanLicenser Architecture: A Typical Organization

Scalable architecture

LanLicenser has been designed to grow with your business. Its n-tier architecture makes it flexible enough to fit organizations of all types and sizes, be they centralized or distributed over the world. Up to 10,000 clients are supported per software metering server.

Low administration requirements

You won't need an army of system administrators to run LanLicenser. It has been designed to be user-friendly and require minimal training. It is easy and quick to deploy.

Product	Licenses	Computers Installed On	Computers Used On	Users Used By	Peak	License Type	Status	Difference
Microsoft Office 2003 Version: 11	10	6	0	0	1	Consistent	OK	9
Microsoft Office Access 2003 Version: 11	0	2	1	1	0	Consistent	OK	0
Microsoft Office Excel 2003 Version: 11	5	2	1	1	1	Consistent	OK	4

Hotmail Version:	1	7	2	3	1	Consistent	OK	0
Paint Version:	0	7	0	0	0	Consistent	Passive	0
Business Managing Client 7 Version: 7	10	2	0	0	0	Workstation	OK	8
Sakhae Version:	0	7	0	0	0	Consistent	Passive	0

Information you can act upon

LanLicenser provides fully customizable reports that enable you to get exactly what you need and want. Our goal is to help you achieve your objectives.

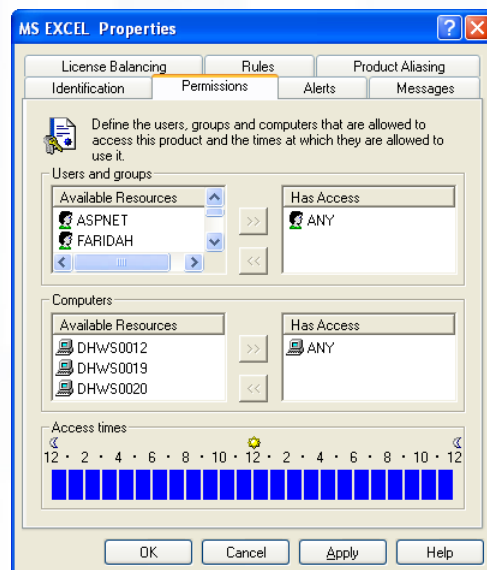

Powerful Application Access Control

LanLicenser provides a number of built in features to ensure only authorized users can access applications. Restrictions can be by workstation name, group membership, cost centre or time of day.

LanLicenser also includes capability to whitelist or blacklist applications.

Get better visibility on your costs

LanLicenser provides you with the necessary information to allocate IT resource costs according to actual usage. This is the most effective way to achieve true cost transparency and implement activity-based costing, which leads to more accurate profit and loss accounts.
